An Estate To Remember

You & Me By The Sea

CASABELLA INTERIORS has extensive experience in guiding clients through the design stages of incorporating contemporary and traditional luxury products to complement a home. Exceeding all expectations, the company successfully designed two beautiful award-winning projects: An Estate to Remember and You & Me By The Sea, both located in Massachusetts, USA.

For An Estate to Remember, the clients wanted help to renovate a master bathroom in a 10,000 sq. ft. estate. The client, known for his precision, had but two requests for his master bathroom redesign: complete the project on his timeline and spare no expense in transforming the room into an oasis. The first of many changes was modifying the layout to take advantage of the ocean views, which entailed relocating the shower to the centre of the room. To elevate the couple's grooming rituals,

premium and custom-designed materials were used, while the shower was outfitted with state-of-the-art technology.

You & Me By The Sea is a 1,000 sq. ft. cottage. Casabella Interiors focused on creating multi-purpose zones and curated custom elements to elevate the overall design. A large island was used instead of a dining room table, with neutral palettes throughout to ensure nothing eclipsed the idyllic sea views.

Moving walls and stealing inches from rooms of every shape and size, the company finessed the home down to the inch to maximise on its functionality. The master bedroom was configured by placing the bed where the closet originally stood, giving the homeowners a chance to enjoy full ocean views. The use of opulent materials and detailing combined with an eye for detail has created two unique properties, typical of Casabella Interiors.
